

# Press Release

## iQpump® \$aver Now Available on iTunes

*iPhone and iPod touch energy savings application for iQpump*

**Waukegan, Ill.** The iQpump® \$aver application is now available on Apple iTunes for iPhone (OS 3.0 or later) and iPod touch. This mobile application estimates energy savings when using an iQpump® Intelligent Pump Controller on centrifugal pumps instead of conventional volume control methods.

iQpump is a reliable electronic device (VFD) that will vary pump speed to match system demand allowing the pump to work at it's best efficiency point (BEP). iQpump® is used in pumping, agriculture, irrigation, and water/wastewater applications to control the speed of centrifugal pumps in various systems. The payback period for installing iQpump® is usually less than three years and can be less than one year.

### About Yaskawa
