

## \$avings Predictor Now Available on iTunes

*New energy savings application for iPhone and iPod touch*

**Waukegan, Ill.** The \$avings Predictor application is now available on Apple iTunes for iPhone (OS 3.1.2 or later) and iPod touch. This mobile application estimates energy savings when using a Variable Frequency Drive instead of conventional volume control methods.

Variable frequency drives are reliable electronic devices that control three-phase electric motor speed. They are used in building automation, industrial, pumping, agriculture, irrigation, and water/wastewater applications to control the speed of fans and pumps in various systems. The payback period for installing drives is usually less than three years and can be less than one year.

### About Yaskawa

Yaskawa is the world's largest producer of variable frequency drives, machine controllers, servo amplifiers and servo motors (rotary, linear, and direct drive). Yaskawa Electric America, Inc. is headquartered in Waukegan, Ill. with manufacturing centers and offices throughout the Americas. For more information on the company or products, please contact Neil Koepke or visit our website at [yaskawa.com](http://yaskawa.com).
